Located in **Auckland**

Hey - I'm Alex. I'm a **software engineering** student at the University of Auckland. I'm currently pursuing an **internship** about anything **software** - with a particular interest in **fullstack, frontend or backend** roles.

Outside of my university work I've been working on learning how to use modern technologies often found in the workplace. I've created some small projects using the React framework. You can find these on my portfolio website. I'm currently working on learning tools used in backend development.

I believe my strong **self motivation, discipline** and **desire to improve** will set me apart as an individual, and my **teamwork, communication** and ability to **adapt** will allow me to be a beneficial asset to any team.

Languages: Java, JavaScript, HTML, CSS, C, MATLAB

Frameworks/Tools: ReactJS, MaterialsUI, Git, GitHub

Projects:

Weather app v2

<https://alux444.github.io/weather-remastered/>

This is a revisited version of my first project (weather app). It includes various improvements to the UI, functionality and features.

The first project can be found at <https://alux444.github.io/weather-api-project/>

Skills used: ReactJS, HTML, JavaScript, CSS, MaterialsUI, RapidAPI / WeatherAPI.com

Fitness app project

<https://alux444.github.io/project-fitness/>

This is a react webapp made in a team of 2. It calls information from ExerciseDB and YoutubeSearch APIs to recommend exercises and some tutorial videos, with the ability to filter through exercises by search or target muscle selection.

Skills used: ReactJS, HTML, JavaScript, CSS, RapidAPI / ExerciseDB API /

YoutubeSearch API

Portfolio website

<https://alux444.github.io/>

This is a simple portfolio website I made during the first mid semester break of 2023.

Skills used: ReactJS, HTML, JavaScript, CSS

Work Experience:

Store Assistant at PaknSave Wairau (January 2022 - Current)

As a store assistant, I am responsible for managing the displays, filling the store, assisting customers and maintaining standards for the shop. I have worked in multiple departments with different people and teams, and frequently work extras where needed.

Customer service, teamwork, communication, adaptability and leadership skills are all soft skills that were crucial to this job, and I believe that I can translate these skills into any field I go into.

Interest(s):

Training:

I'm very passionate about my training and fitness. I have experimented with multiple different types of training, including lifting, calisthenics and parkour. This has helped me build a strong **self-motivation, desire to improve** myself and a **strong discipline**. I believe these qualities translate well into both my academic and work life.

Art:

I have been learning fine art for many years now, and experimented with many different mediums and styles. It has taught me the value of **patience, pacing** and **the importance of consistency** in order to grow.
